

ROLE

DOCUMENTARIAN

Goals

My goals are:

- Update API documentation.
- Improve clarity of UI text.
- Shift in-app focus to the user experience.
- Establish documentation metrics.

Concerns

My concerns are:

- Developers don't prioritize docs.
- Too much work, not enough time.
- Unsure how to measure business value.

External influences

- Need to report on documentation success/failure in upcoming meeting.
- Unusually high family responsibilities recently.
